Applicant's election with traverse of Group I, claims 1, 2, 7, and 10-12, in the response submitted December 17, 2003 is acknowledged. The traversal is on the ground(s) that the task of conducting a search is not undue. This is not found persuasive because the product as claimed can be used in a materially different process of using that product.

The requirement is still deemed proper and is therefore made FINAL.

It is noted that claims 8 and 9 are directed to a non-elected species and are not currently being considered.

The abstract of the disclosure is objected to because the abstract should be one paragraph. Correction is required. See MPEP § 608.01(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 7, and 10-12 are rejected under 35 U.S.C. 102(b) as being anticipated by van der Heijden et al (GB 1,379,019), van der Heijden et al (US Patent No. 3,787,473), and van der Heijden et al (US Patent No. 3,978,240).

van der Heijden et al (GB 1,379,019) teach flavor precursors in a food having the formula $R_1-S-CO-O-R_2$ as is claimed (see entire document, especially page 2, line 1 to page 3, line 21).

van der Heijden et al (US Patent No. 3,787,473) teach flavor precursors in a food having the formula $R_1-S-CO-O-R_2$ as is claimed (see entire patent, especially column 2, lines 29 to column 3, line 58).

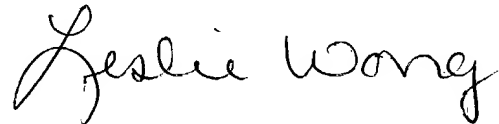

van der Heijden et al (US Patent No. 3,978,240) teach flavor precursors in a food having the formula $R_1-S-CO-O-R_2$ as is claimed (see entire patent, especially column 2, line 9 to column 3, line 48).

Schutte et al is cited as of interest.
